Tailored to Your Business

# Close customer relationships for 140 years

The family-owned company **AS-Schneider**, founded in 1875, with around 350 employees, is one of the world-wide leading manufacturers of Instrumentation Valves and Manifolds.

We find close customer relationships particularly important. From the design stage to the finished valve or a complete solution, we therefore rely on detailed coordination with the customer.

Based on specific needs, requirements and areas of application, we put together a customised valve portfolio, then stand at our customer's side before, during and after implementation of the project.

# We are there when you need us

For us, close customer relationships are something very personal and individual. They are based on a close partnership with our customers.

# We are your reliable project partner

Successful projects require competence, continuous communication and mutual trust. Thanks to the long-term service of **AS-Schneider** staff, our customers always have familiar contact persons they can trust.

Our close cooperation with customers and the high level of staff qualification permits not only successful realization of projects, but also the daily use and pooling of comprehensive knowledge and experience.

## **Everything from a single source**

Our highly automated and comprehensive range of machinery reinforces our independence and guarantees consistently high product quality for our customers.

The depth and extreme flexibility of our production ensure that we can meet every requirement of our customers entirely in-house – from the fabrication of single parts to the management of large projects.

## We love the challenge

*AS-Schneider* engineers are always venturing into new technological territory to ensure their development efforts keep up with current requirements and technologies.
