Valve manufacturer AS-Schneider at the ACHEMA Pulse 2021:

### Reliable products and high competence

**Nordheim (Germany) – May 18, 2021 – The specialist for industrial valves Armaturenfabrik Franz Schneider (short form: AS-Schneider) will present its portfolio at the digital [ACHEMA Pulse](#) on June 15 and June 16, 2021. Among other things, the visitors of the online exhibition will have the opportunity to learn about the company's expertise in all aspects of hydrogen storage and transport. Another priority is the new version of the TA-Luft that was announced for 2021, whose requirements AS-Schneider's products already meet.**

The world's leading trade fair for the process industry, ACHEMA, will not be held as an in-person event in Frankfurt am Main as usual this year due to the ongoing restrictions caused by the Corona pandemic. Instead, the organizers launched the digital format [ACHEMA Pulse](#) as an alternative: On June 15 and June 16, 2021, the attendees can securely and conveniently experience the latest trends and innovations in process technology for chemistry, pharmaceuticals, biotechnology, energy and the environment online.

AS-Schneider is also there: The company from Nordheim near Heilbronn in Baden-Württemberg is one of the world's leading manufacturers of industrial valves for measurement and control technology. They are used in a wide variety of industries, such as oil and gas, chemicals and petrochemicals, power generation, and pulp and paper production. At the ACHEMA Pulse, AS-Schneider will demonstrate, among other things, its comprehensive expertise on the trending topic of hydrogen: For more than 20 years, the specialist has been manufacturing products that are especially suitable for the storage and transport of this demanding

medium. Selected metallic and non-metallic materials and sophisticated test methods allow for a wide range of instrumentation and pipeline valves. AS-Schneider continuously develops its portfolio in accordance with the latest standards, research and test results to ensure the safety of the people and the environment.

Another central topic of AS-Schneider's digital trade fair presence is the updated version of the TA-Luft, which is due to come into effect this year. The directive is part of the Federal Immission Control Act and serves to prevent harmful effects on the environment caused by air pollution. Part of the new version is, among other things, a modified test process for industrial valves in order to guarantee a verifiable and comparable tightness under all operating conditions. At AS-Schneider, this has already been standard for ten years, which is why the manufacturer's valves already fully meet the requirements of the new TA-Luft. The company has also been actively involved in the standards committee for years and is therefore a competent contact partner for all questions regarding the legal requirements.
